DETAILED ACTION

Remark

1. Claims 1-32 and 34-38 have been previously cancelled. Pending claim is claim 33 only for reconsideration.

Response to Arguments

2. Applicant's arguments with respect to claim 33 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Guedalia (U.S. Patent No. 6,536,043 B1) in view of Lobodzinski (US Patent 5,619,995).

Regarding claim 33, Guedalia shows a method for displaying live continuous video (Fig. 1 and col. 3/lines 1-15 & col. 4/line 63 to col. 5/line 8 for live and real-time interactive streaming video) comprising encoding video into a low resolution bit rate stream and a higher-resolution bit rate stream (Fig. 1 for an encoder 5 & col. 3/line 35 to col. 4/line 16 for low and high resolution quality are delivered from the source via the encoder) and displaying a single image of the video using the higher resolution bit rate stream (Fig. 7 & Fig. 12 and col. 34/lines 3-31 as the user can select and controls the bit rate for presentation the images and/or video at

Art Unit: 2623

the display); and performing at least one of the following actions: displaying a 2x2 array of the video using the higher resolution higher bit rate stream (Fig. 17 and col. 36/lines 36-47 for display of two dimensional and/or three dimensional array of images addressed).

Guedalia does not suggest the technique of displaying together on a client at least two streams of live continuous video (as amended); however, Lobodzinski teaches an exact same technique of teaching the displaying of multiple streams of live video on a same display at the client or user (Figs. 5-6 & 8, see col. 7/lines 62-64; col. 12/line 54-67, and col. 13/lines 37-57). Therefore, it would have been obvious to one of ordinary skill in the art to modify Guedalia's system with Lobodzinski's disclosed technique in order to simultaneously display more than one video stream of live continuous video on the client or user's display for a comparison purpose and/or at the same time keeping track of simultaneous live events on the same display screen.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
